

TOPIC : FIRST FIT

OUTPUT :

```
mey@localhost:~$ gcc bestfit.c -o bestfit
[mey@localhost ~]$ ./bestfit
Enter number of memory blocks:
5
Enter size of each block:
100 200 300 400 500
Enter number of processes:
4
Enter size of each processes:
112 113 114 115

Process No.    Process Size    Block No.
1              112            2
2              113            3
3              114            3
4              115            4
[mey@localhost ~]$ vi bestfit.c
[mey@localhost ~]$
```

```
Activities Terminal Apr 7 14:11
mey@localhost:~$ vi bestfit.c
